About BLD Institute...

BLD Institute of Agriculture has established and developed all its operations to achieve high academic standards and to provide quality and value-based education to prepare students to face global challenges in agriculture education and respective studies. The Management has 25 years of rich experience in running the reputed educational institutions with a motto of imparting education strengthened by immense quality.

The prime objective of BLD Institute of Agriculture is to update and modernize the quality of professional education. It aims to employ innovative teaching methods which carry an emphasis on fast-changing technological trends. Equipped with the facilities of International Standard and the faculty with an unshakable commitment to providing quality education, these Institutes have been marching forward to set new standards in the field of agriculture education.

Approval of ICAR

As per law, ICAR is advisory and recommending body not a regulatory authority like AICTE, MCI, VCI, etc. Generally, ICAR is an agency to provide financial assistance for carrying out various kinds of researches in agriculture and allied fields. http://www.icar.org.in/en/node/830

Founder

Shri. Bapusaheb

Deshmukh

The BLD Institute of Agriculture is the platform for research and teaching in agricultural sciences. Today and in future agricultural research requires a multifaceted approach, integrating agricultural and natural science-based methods and concepts. Agricultural production systems are closely interrelated with other systems and are highly complex. The prime objective of BLD Institute of Agriculture is to update and modernize the quality of professional education.

Vision...

Our Vision To aim at inculcating the spirit of high ambitions, healthy attitudes, discipline and multidimensional excellence in the students and strive to mold them to scale new heights and get their mental horizons enlarged through value-based technical education and a congenial study environment.

Mission...

Our Mission to sharpen the inherent professional skills of our students to enable them competes in the complex world through our newly evolved quality management system and dedicated staff. The practical oriented education and the research tie-up with industries we provide, tend to promote the intellectual pursuits of the students.

Agriculture

Agriculture is the science of farming, including cultivation of the soil for the growing of crops and the rearing of animals to provide food, wool, and other products.

Paramedical

Paramedical is the medical science that deals with pre-hospital emergency services which supplement and support medical work but do not require a fully qualified doctor.
